One-line version. Sentinelle Systems LLC (CAGE 18QJ7, UEI HVTNPB8PHKH4, Virginia SWaM #843173) operates SPRS / NIST 800-171 evidence, prime flow-down translation, Huntress-mapped detection, and named vCISO support for small DIB contractors. We prepare and operate. We do not certify. McLean, VA. 571.599.6312.

ROLE

We prepare, operate, and put a name on the packet. We do not certify you. We are not a C3PAO and not a listed Cyber AB RPO. We do not staff a night-shift SOC. Detection is Huntress. Delivery is owner-delivered and specialist-sub executed. We pursue teaming. We do not list primes as past performance unless a subcontract is awarded. Operate from $129/user/mo is sold only as a bundle into Watch + Sentinel — not a helpdesk homepage.

FOUR NAMED OFFERS · published bands are the floor

Offer	Published band (floor)	What is delivered
SPRS Sentinel	$197/mo founding · $297 standard. Optional human review $500–$1,500/mo.	Living SPRS worksheet, SSP/POA&M, evidence vault. Drafts only until a named human reviews any number that will be submitted.
Flow-Down Desk	$2,500–$7,500 pilot, then $1,500–$3,000/mo.	This prime's clause set → 2-page owner checklist + shop-specific Shared Responsibility Matrix.
Watch + Evidence	From $65/user/mo. Floor 10 users or $650/mo.	Huntress detection. Every alert mapped to a NIST SP 800-171 control and a client-visible write-up. Not "our SOC."
vCISO-of-record	$2,500–$8,500/mo or $2,500–$7,500/quarter.	Affirming Official coaching, prime-ready risk letter, DFARS 7012 playbook, two tabletops a year.

PRIMARY NAICS · short verified list. Not 190+.

541512 — Computer Systems Design Services	541519 — Other Computer Related Services
541611 — Management Consulting Services	541690 — Other Scientific and Technical Consulting
541330 — Engineering Services	561990 — All Other Support Services

Boundary. Sentinelle will not assess any organization it prepares. The client remains the Affirming Official and the DFARS 252.204-7012 reporting entity. CUI does not go into public models. Huntress watches. Sentinel files. You sign. We stand next to the signature.

Shared Responsibility Matrix · sample

Planning artifact · not a contract · not an assessment · Updated 13 September 2026

How to use this. A signed, shop-specific SRM is issued with the SOW after scoping. This sample shows the default split a prime vendor portal would accept conceptually. Columns do not move work that the law or the contract puts on the contractor. Sentinelle prepares and operates. Sentinelle does not certify.

HARD RULES

- Client remains the Affirming Official and the DFARS 252.204-7012 reporting entity.
- Huntress is the 24/7 sensor. Sentinelle is not a captive SOC.
- Sentinelle will not assess any organization it prepares. The firm that prepares cannot be the firm that assesses.
- CUI does not go into public models.
- PE / FSO / visitor control stay with the client unless a named cleared partner is in the SOW.
- Humans sign SPRS, SSP, and incident notifications. AI drafts. A named human signs.
- No 15-minute human IR SLA. Client-visible write-up target is business hours; on-call incident command for confirmed events.
- This SRM is a planning artifact, not a contract and not an assessment.

Shared Responsibility Matrix · default split

Planning artifact · not a contract · not an assessment · shop-specific SRM issued with the SOW

Control area	Client	Sentinelle	Huntress	ESP / enclave partner (if used)
SPRS / SSP / POA&M	Affirming Official. Signs SPRS, SSP, and POA&M. Owns accuracy of any score submitted.	Drafts, organizes, ages objects, prepares the packet. Does not certify. Does not assess.	Not responsible for scores or system security plans.	Does not sign SPRS. Hosts CUI-resident artifacts only if named in the SOW.
Evidence vault	Supplies source systems, access, and approvals. Owns the records.	Operates the vault, maps controls, flags stale objects. Rejects objects without a source receipt.	Telemetry source for mapped alerts.	May store CUI-resident artifacts if named in the SOW.
MDR / alerting	Owns endpoints and change windows. Approves containment that can break production.	Maps alerts to NIST SP 800-171, writes the client-visible note, escalates. Not a captive SOC.	24/7 sensor: endpoint and identity detection. The night watch.	Out of scope unless named.
IR / 72-hour DFARS 7012	Remains the DFARS 252.204-7012 reporting entity. Decides reportability. Signs notifications.	On-call incident command, playbook, draft 7012 package. Does not report to DoD as the contractor.	Alert and investigation artifacts.	Isolation or containment in the enclave only if written into the SOW.
CUI boundary	Owns data classification and the boundary decision.	Scope-reduction advice, SRM, boundary evidence. CUI does not go into public models.	Sensors on enrolled in-scope endpoints.	Implements the enclave if used.
Microsoft 365	Tenant owner. Admin consent and licenses.	Configuration guidance, evidence collection, access reviews.	ITDR / identity detections if licensed.	GCC High or enclave tenant only if named.
Affirmation signature	Named Affirming Official. Signs. The human residual cannot be outsourced.	Coaches, prepares the packet, stands next to the signature. Will not assess any organization it prepares.	No signature role.	No signature role.
PE / FSO / visitor control	Stays with the client unless a named cleared partner is in the SOW.	Does not provide FSO, visitor control, or physical security as a service.	Not applicable.	Only if a named cleared partner is written into the SOW.

Site line. Huntress watches. Sentinel files. You sign. We stand next to the signature.
